

# Introduction

06 July 2018

21:58

## Text Retrieval and Search Engines:

### Readings

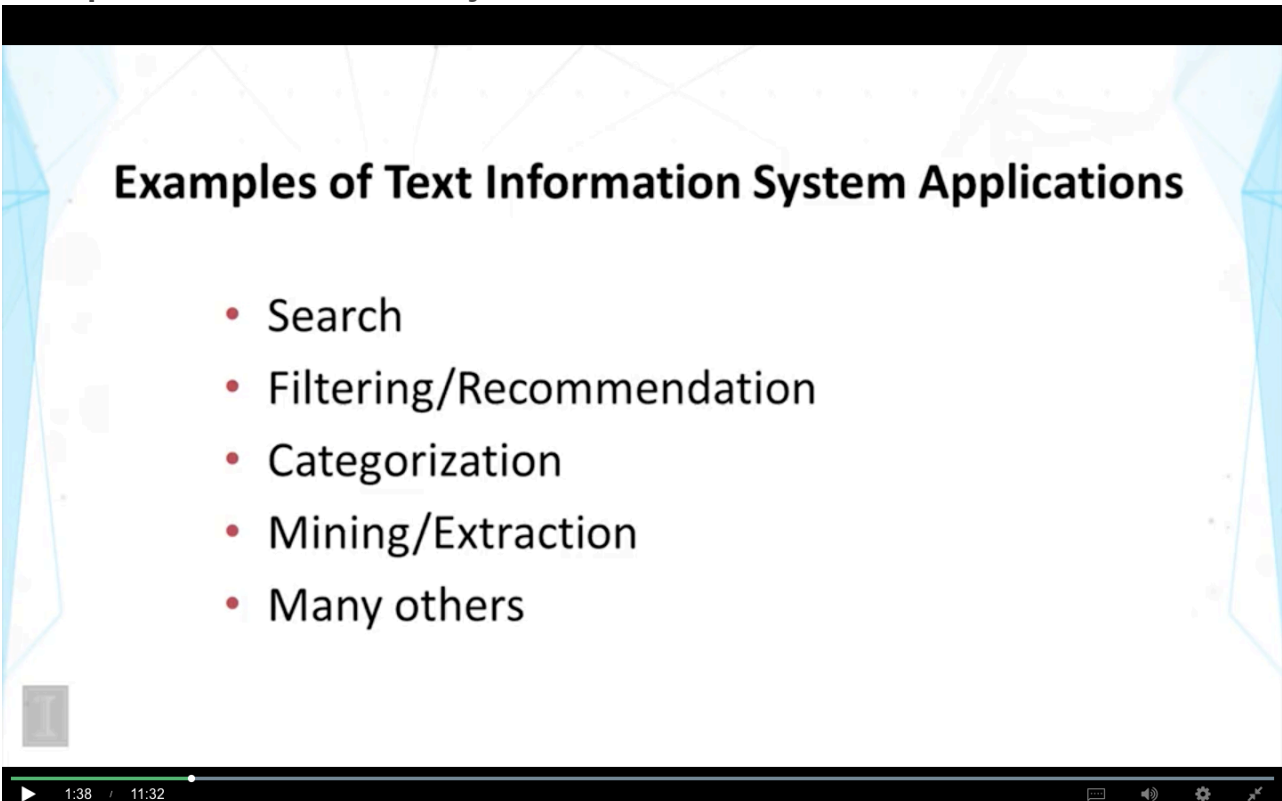

1. Detailed discussion and comparison of state of the art models
2. Broad review of different retrieval models

### Lecture Content

-----X-----

### Orientation:

Examples of text information system:

The video player displays a slide with a light blue geometric background. The slide title is 'Examples of Text Information System Applications'. Below the title is a bulleted list of applications. The video player interface at the bottom shows a progress bar at 1:38 / 11:32 and standard playback controls.

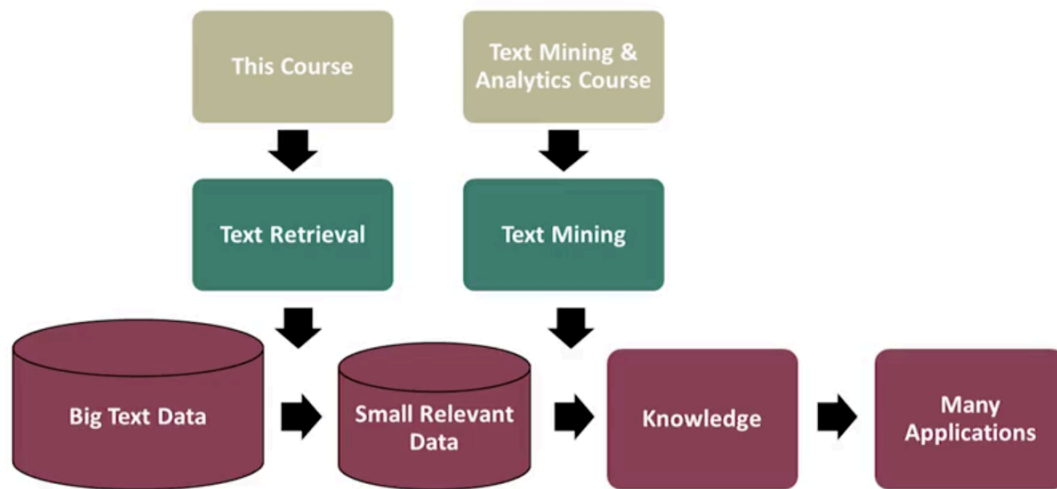

### Examples of Text Information System Applications

- Search
- Filtering/Recommendation
- Categorization
- Mining/Extraction
- Many others

### NLP Process (IMP):

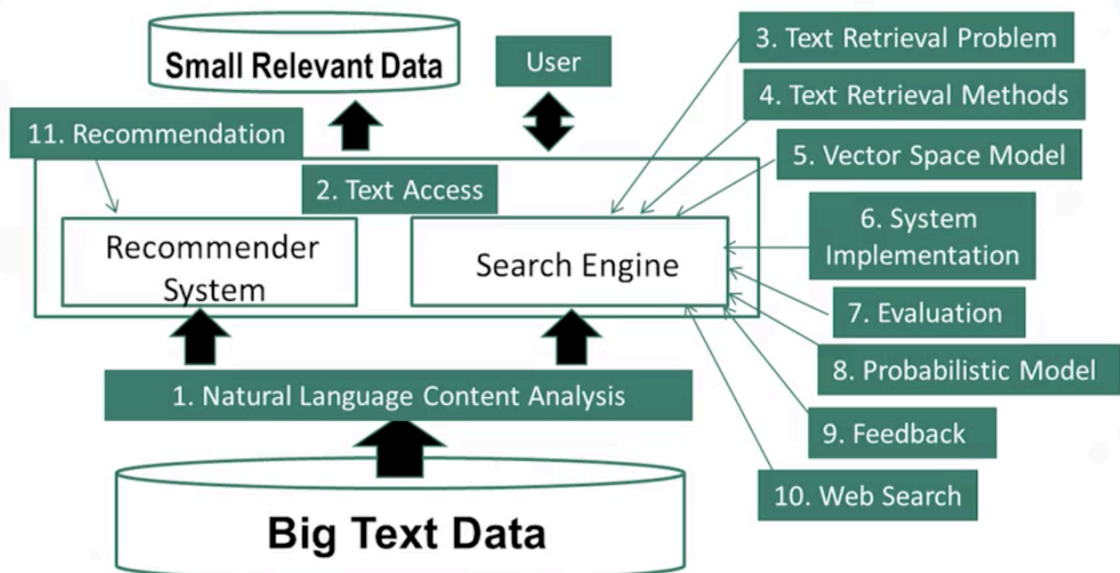

## Main Techniques for Harnessing Big Text Data: Text Retrieval + Text Mining

### Text Retrieval Process (IMP):

## Course Schedule
